

Pre-K 4 Awesome News!

May 12th-16th

This Week

This week we learned more about the letters "I" and "J". Throughout the week we read Iguana on Ice and Jaguar's Jungleberry Jamboree. After we read each story, we practiced reading the alphabet cheer for the letter. The kiddos are doing a great job "reading" along and finding the words that start with each letter.

This week we learned about different types of insects. Throughout the week we learned about the life cycle of a butterfly. We learned that butterflies start off as tiny eggs, pop out as a baby caterpillar, build a chrysalis around themselves, and metamorphosize into beautiful butterflies. Throughout the week we loved dancing and pretending to be each stage of the butterfly's life cycle.

Throughout the week we also learned about bees. We learned that bees are pollinators and help flowers to grow. They also collect pollen and turn it into honey back at their hives. On Tuesday, Mr. Tom, a real-life beekeeper, came in to talk to us about the importance of bees. Mr. Tom even brought us real bees to look at. After his presentation, Mr. Tom let us taste some of his delicious honey.

During center time, we had fun playing in our swamp, bird, bee and bug sensory tables. We loved seeing all the different things that we could find in each bin. We also build our own zoo out of blocks and animals. During our outside time, we had fun playing in the house, mowing the lawn, and watering all of our flowers in our Kindness Garden!

Looking Ahead

We will be learning about swamp animals.

Looking Ahead

May 26th
Memorial Day
No School

May 27th
End of the Year
Conferences

May 30th
Art Show
NO AFTER SCHOOL
