

Pre-K 2 Newsletter

January 9th – January 13th

We had a great week!

This week at school we continued talking about arctic animals. We discussed how penguins have thick feathers. We learned that all their feathers are waterproof, which helps keep them warm in the bitter cold.

We also talked about arctic foxes and how they keep warm by wrapping their big fluffy tails around themselves.

The kiddos had a blast this week playing in our build a snowman center. Everyone had a chance to decide how they wanted our snowman to look. We also had fun making different pictures by matching the right colored buttons on our puzzle boards.

We had fun with Miss Katie this week trying to dance while balancing bean bags on different parts of our bodies. Miss Carly also stopped by to read us a few stories and help us shake our sillies out dancing to some of our favorite songs.

Some of the stories we read this week are Arctic Babies, Mouse's First Snow, Seven Weeks on an Iceberg, and Arctic Fox.

This month we are working on learning the oval shape and the color blue.
