Preschool Awesome News!

This Week

We had a blast learning more about the letters "J", "K", and "L" this week! We enjoyed listening to our new alphabet sound songs and singing along to the catchy tunes. Throughout the week we practiced a new song to help us identify each letter and the sound that they make! We also rocked out to the "The Number Rock" song counting all the way to 20!

During circle time we began learning about the life cycle of caterpillars. We learned that caterpillars start out as tiny eggs, turn into caterpillars, then build a chrysalis where they metamorphosize into beautiful butterflies. As a fun science experiment, we have our very own classroom caterpillars that are currently in their chrysalises transforming in to butterflies. We hope to see them emerge next week!

Throughout the week we read The Very Hungry Caterpillar by Eric Carle. The kiddos enjoyed listening to the story and using giant food pieces to retell the story as if they were the Hungry Caterpillar. We even had the chance to act out the lifecycle of a caterpillar on the playground!

During center time we had fun playing in the jungle center with lots of animals, building with Legos, making ramps, building towers, and cooking in the kitchen!

Looking Ahead

May 25th
Conferences

May 26th
