

### Circle Time

During circle time this week, we read Penguins Love Colors, it was all about six penguins who made their mommy a special colorful surprise using all the different colors they loved. We also read Friendly Fish and All By Myself. This month we are working on the heart shape and the color purple.

### Centers

In our sensory bin, we had a great time playing in the water with all our sea animals. We also had fun in our art center getting messy drawing and painting. The kiddos love to see all their artwork hanging up. In our dinosaur center, we were stomping and roaring around the classroom pretending to be different kinds of dinosaurs.

### Specials

In specials the kiddos enjoyed making so much noise using all our instruments while pretending to be in a marching band. We also had an awesome time playing, jumping, hopping, and crawling in our obstacle course.

### Crafts

During craft time we made jellyfish. First, we glued on different colored tissue paper to a paper bowl then added eyes and ribbon for the tentacles. We also made crabs to go along with our ocean theme. The kiddos are doing a great job learning how to use all the different materials to make our crafts.
